Electric water level control

Options and accessories

Electric water level control package

When you require **more precise water level control**, replace the standard mechanical make-up valve with an electrical water level controller. An electric water level control package

- - reduces water consumption
 - helps maintain your system year-round
 - increases the equipment reliability

The package consists of

- a basin-mounted float switch
- a solenoid-activated valve in the make-up water line

The valve closes slowly to minimize water hammer.
