

Clean out port

Spare parts guide

Clean out port

Benefits

- Facilitates cleaning of the basin by **easy removal of sludge** and other impurities.
- Facilitates inspection by **faster draining** of the basin water in combination with the standard drain connection.
- Helps preventing biological growth (such as legionella) by easy cleaning and inspection of the basin.
- Maintains thermal performance by preventing dirt getting circulated into the water distribution system.
- Enables **water treatment** to be fully effective.
- Available on most BAC products.

Want to install a clean out port on your BAC equipment? Contact your [local BAC representative](#).
