HFL Closed circuit cooling towers

Key benefits

- Unrivalled water savings
- Compact
- Superb hygiene control

HFL characteristics

Counter flow, centrifugal fan, forced draft Hybrid wet-dry cooling

Capacity range

up to 1870 kW

Maximum entering fluid temperature

82°C

Typical applications

- Medium to large HVAC and industrial applications
- Low height requirements
- Water saving requirements
- Plume reduction requirements
- Tight enclosures and installations requiring a single air inlet
- Indoor installations
- · Sound critical installations

BA

Unrivalled water-saving

- Patented intelligent flow control system!
 With a <u>3-way valve</u> for precise setting of outlet fluid temperature and unrivalled annual water-saving.
- Load profile-adaptable to dry, adiabatic or combined wet-dry operation.

Compact

- Side by side installation for double cell towers. Water basin access is at tower connection end.
- Very low height. Fits perfectly on roof tops or tight enclosures.
- Low operating weight. Water basin contains only 1/4 of the water of conventional evaporative fluid coolers.

Superb hygiene control

- Dry-running for 10 months per year possible depending on application and weather conditions.
- Self-cleaning auto-drain sump to prevent stagnant water.
- Basin for water outside air stream and accessible during operation

For reduced noise

- Low noise centrifugal fans for a quieter environment.
- Single-side air inlet, and a quieter tower rear for more noise-sensitive areas.

Easy to install

- Single-side air inlet lets you install **next to solid walls**.
- Units housable **indoors** thanks to centrifugal fans allowing intake or discharge ductwork.

Guaranteed year-round reliable operation

- During dry winter operation, **no extra sump drainage needed**. With HFL water basin outside airstream, and heaters to prevent basin water freezing, even with fans at top speed.
- Non-plume wet operation thanks to optional <u>dry finned coil</u>: it reduces humidity of discharge air from the prime surface coil.
- Various corrosion-resistant materials, including the unique <u>Baltibond[®] hybrid coating</u> for guaranteed long service life.

Interested in the HFL hybrid closed circuit cooling tower for cooling your process fluid? Contact your local <u>BAC representative</u> for more information.
